Statement:

Without a written consent from the laboratory, the report may only be reproduced as a whole.

The test results apply only to the tested items. The results apply to the sample as it was received.

The laboratories of the State veterinary institute Olomouc are not responsible for sampling or for the correctness of any data provided by the client about the sample.

The data provided by the client is the data identifying the order and the sample, with the exception of the this data: Date of delivery, Date of completion

The stated expanded measurement uncertainty is obtained by multiplying the standard measurement uncertainty and the coverage factor  $k=2$ , which for a normal distribution corresponds to a coverage probability of 95%. The stated expanded uncertainty is expressed as a  $\pm$  % of the determined value (relative expression of uncertainty) or a  $\pm$  value in parameter units (absolute expression of uncertainty). In the case of an absolute expression of the measured uncertainty, the parameter unit is not stated after the uncertain value.

Sampling uncertainty is not part of the expanded measurement uncertainty reported on the test report.

The data marked in the report with an asterisk \* are not covered by the accreditation.
